About The Meeting

This seminar is designed to provide a practical review of genitourinary, pulmonary and neuropathology. Faculty will discuss basic to advanced techniques, pitfalls and pearls to pathologic diagnosis. Interactive case reviews emphasizing the material presented will round out the program.

Target Audience

This CME activity is primarily intended and designed to educate pathologists.

Needs Assessment

This is an annual meeting aimed at pathologists to improve the quality of their diagnostic and consulting skills. The topics are selected through identification of professional practice gaps, the review of previous evaluations, expert faculty opinion and input from participants.

Program Accreditation

Physicians: Educational Symposia is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Educational Symposia designates this live activity for a maximum of 20.0 *AMA PRA Category 1 Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

American Board of Pathology (ABP) Maintenance of Certification (MOC)

This activity provides up to 17.75 SAM eligible CME for the American Board of Pathology MOC Program. Participants must take and pass a post-test in order to earn SAM credit.

Educational Objectives

Attendees should, at the completion of this course, be able to:

- Discuss how the evaluation of transbronchial, cryo, needle and surgical lung biopsies differ based on biopsy technique.
- Recognize the major diagnostic pitfalls in the diagnosis of lung adenocarcinoma and non-adenocarcinoma thoracic neoplasms.
- Develop an integrated approach to the diagnosis of lung cancer.
- Discuss the importance of pathological and radiological correlation in pulmonary disease.
- Better understand the evaluation of a blue biopsy.
- Recognize the pearls and pitfalls of interstitial lung diseases and their mimics.
- Discuss the WHO classification and cIMPACT-NOW classification guidelines for CNS tumors.
- Better understand peripheral nerve sheath tumors.
- Recognize glial and glioneuronal neoplasms.
- Develop an integrated approach to intraoperative CNS consultations and frozen sections.
- Appreciate meningioma grading and other meningeal neoplasms.
- Discuss the diagnosis and reporting of limited adenocarcinoma on needle biopsy of the prostate.
- Analyze common bladder tumors on biopsy and TURB specimens.
- Review common differential diagnoses in bladder lesions.
- Review common differential diagnoses in prostate lesions.
- Recognize mimickers of bladder neoplasm.
- Better understand medicolegal issues in pathology cases relating to genitourinary pathology.

No special educational preparation is required for this CME activity.
