Gastrointestinal and Soft Tissue Pathology with Microscopy:

A One-on-One Tutorial

ON-DEMAND, USB & DVD

10.0 AMA PRA Category 1 Credit(s)[™]

Release Date: July 15, 2019

About This CME Teaching Activity

This series is designed to provide a practical yet comprehensive review of gastrointestinal and soft tissue pathology with an emphasis on microscopy. A strategic approach to diagnosis, differential diagnosis, pearls and pitfalls in gastrointestinal and soft tissue pathology will be addressed through didactic lectures and correlating microscopic case reviews.

Target Audience

This CME activity is primarily intended and designed to educate pathologists.

Scientific Sponsor

Educational Symposia

Accreditation

Physicians: Educational Symposia is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Educational Symposia designates this enduring material for a maximum of 10.0 *AMA PRA Category 1 Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

All activity participants are required to take a written or online test in order to be awarded credit. (Exam materials, if ordered, will be sent with your order.) All course participants will also have the opportunity to critically evaluate the program as it relates to practice relevance and educational objectives.

***AMA PRA Category 1 Credit(s)*[™] for this activity may be claimed until July 14, 2022.**

This CME activity was planned and produced by Educational Symposia, a leader in continuing medical education since 1975.

This activity was planned and produced in accordance with the ACCME Essential Areas and Elements.

Educational Objectives

At the completion of this CME teaching activity, you should be able to:

- Recognize the major diagnostic pitfalls in the diagnosis of Barrett's esophagus and Barrett's-related dysplasia.
- Describe the evolution of diagnostic immunohistochemistry for soft tissue tumors.
- Identify some of the major diagnostic issues in the most common colorectal polyps, including serrated polyps.
- Describe the most recent diagnostic challenges in diagnosing and reporting colorectal polyps.
- Discuss the most common benign and malignant well-differentiated lipomatous tumor.
- Differentiate gastroesophageal reflux disease from other types of esophageal injury.

No special educational preparation is required for this CME activity.

**John R. Goldblum, M.D.**

*Chairman, Department of Pathology, Cleveland Clinic
Professor of Pathology, Cleveland Clinic Lerner College of Medicine
Cleveland, OH*

Program

Session 1

Controversies in the Diagnosis of Barrett's Esophagus and Barrett's-Related Dysplasia

Microscopy - Esophageal Pathology:
With a Focus on Barrett's Esophagus and Barrett's-Related Dysplasia

Session 2

Nomenclature of Colorectal Polyps:
Controversies and Confusion

Microscopy – Colorectal Polyps: Basic Issues
Including Controversies in Nomenclature

Session 3

The Trouble with Fat: Diagnostic Issues with
Well-Differentiated Lipomatous Tumors

Microscopy - Well-Differentiated Lipomatous
Tumors

Session 4

A Practical Approach to Mesenchymal Tumors
of the GI Tract

Microscopy - Gastrointestinal Mesenchymal
Tumors

Session 5

Common Morphologic Patterns in
Soft Tissue Tumors

Session 6

Fibrohistiocytic Tumors of Soft Tissue with
a Focus on Fibrohistiocytic Tumors of
Intermediate Malignancy

Inflammatory Bowel Disease and IBD-related
Dysplasia: One Pathologist's Perspective
