Educational Symposia is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. Educational Symposia designates this enduring material for a maximum of 15.0 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. All activity participants are required to take a written or online test in order to be awarded credit. (Exam materials, if ordered, will be sent with your order.) All course participants will also have the opportunity to critically evaluate the program as it relates to practice relevance and educational objectives. AMA PRA Category 1 Credit(s)™ for this activity may be claimed until July 31, 2022.

This CME activity was planned and produced by Educational Symposia, a leader in continuing medical education since 1975. This activity was planned and produced in accordance with the ACCME Essential Areas and Elements.

Educational Objectives
At the completion of this CME teaching activity, you should be able to:

• Assess normal fetal anatomy in the first trimester.
• Explain the indications and national guidelines for first trimester ultrasound.
• Optimize scanning parameters and techniques of the first trimester ultrasound examination.
• Review major fetal malformations that can be diagnosed in early gestation.
• Discuss the use of ultrasound in screening for fetal aneuploidy in the first trimester.
• Utilize ultrasound to assess patients with pelvic disorders.
• Demonstrate increased knowledge into the applications of OB/GYN scanning procedures.

No special educational preparation is required for this CME activity.

About This CME Teaching Activity
This activity provides a practical, clinically oriented review of recent advances in first trimester and OB/GYN ultrasound. A mix of topics including comprehensive normal fetal anatomy and abnormalities of major organ systems in the first trimester is included. Updates to current guidelines and indications for imaging in the first trimester and evaluation of OB/GYN emergences are presented. Tips, images, and pitfalls shared by the renowned faculty provide balance to the program. A CME Teaching Activity
