

2020 Surgical Pathology Update: Diagnostic Pearls for the Practicing Pathologist - Volume IV

Release Date: March 1, 2020 | 15.75 AMA PRA Category 1 Credit(s)TM

About This CME Teaching Activity

This CME activity is designed to provide a practical and comprehensive review of a number of practical topics in surgical pathology including gastrointestinal, pulmonary, gynecologic, hepatobiliary, genitourinary, and soft tissue pathology. An overview of diagnostic pearls which allow for accurate diagnosis and clues to avoiding the most common diagnostic pitfalls are addressed. Faculty discuss appropriate diagnostic immunohistochemical and molecular genetics tests which allow refined diagnosis.

Target Audience

This CME activity is primarily designed to educate practicing pathologists.

Scientific Sponsor

Educational Symposia

Accreditation

Physicians: Educational Symposia is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Educational Symposia designates this enduring material for a maximum of 15.75 AMA PRA Category 1 Credit(s)TM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

All activity participants are required to take a written or online test in order to be awarded credit. (Exam materials, if ordered, will be sent with your order.) All course participants will also have the opportunity to critically evaluate the program as it relates to practice relevance and educational objectives.

**AMA PRA Category 1 Credit(s)TM
for this activity may be claimed until February 28, 2023.**

This CME activity was planned and produced by Educational Symposia, a leader in continuing medical education since 1975.

This activity was planned and produced in accordance with the ACCME Essential Areas and Elements.

Educational Objectives

At the completion of this CME teaching activity, you should be able to:

- Discuss the most common benign and malignant well-differentiated lipomatous tumor.
- Describe the most useful immunohistochemical and molecular genetic tests in distinguishing soft tissue tumors with the most common patterns.
- Identify the recent WHO classification of renal cell carcinoma, including the distinction of cortical and medullary-based tumors.
- Recognize morphologic features that distinguish conventional and variant morphology of urothelial carcinoma.
- Understand how to diagnose endometrial hyperplasia and metaplasia.
- Distinguish between different subtypes of endometrial carcinoma, including the role of molecular testing.
- Differentiate gastroesophageal reflux disease from other types of esophageal injury.
- Recognize key features of celiac disease and other disorders that cause villous blunting.
- Discuss the utility of clinical and morphologic features and immunohistochemical stains in the differential diagnosis of hepatocellular mass lesions.
- Identify key clinical and laboratory features that allow specific diagnoses for medical liver biopsies exhibiting the acute and chronic hepatitis patterns of injury.
- List the key pathologic features of usual interstitial pneumonitis.
- Recognize key changes in diagnosis and therapy pertaining to lung pathology.

No special educational preparation is required for this CME activity.

Faculty

John R. Goldblum, M.D.

*Chairman, Department of Pathology, Cleveland Clinic
Professor of Pathology, Cleveland Clinic Lerner College of Medicine
Cleveland, OH*

John Hart, M.D.

*Professor
Sections of Surgical Pathology & Hepatology
University of Chicago Medical Center
Chicago, IL*

Michelle S. Hirsch, M.D., Ph.D.

*Brigham and Women's Hospital
Chief, Genitourinary Pathology Division
Staff Pathologist, Women's & Perinatal Pathology
Associate Professor of Pathology
Harvard Medical School
Boston, MA*

Sanjay Mukhopadhyay, M.D.

*Staff Pathologist
Director, Frozen Sections
Department of Pathology
Cleveland Clinic
Robert J. Tomsich Pathology and Laboratory Medicine Institute
Cleveland, OH*

Marisa Rose Nucci, M.D.

*Professor of Pathology
Harvard Medical School
Director, Pathology Residency Training Program
Brigham and Women's Hospital
Boston, MA*

Rhonda K. Yantiss, M.D.

*Chief, Gastrointestinal Pathology
Department of Pathology and Laboratory Medicine
Weill Cornell Medicine
New York, NY*

Program

Session 1

The Trouble with Fat: Diagnostic Issues with Well-Differentiated Lipomatous Tumors

John R. Goldblum, M.D.

A Diagnostic Approach to The Many Subtypes of Renal Cell Carcinoma

Michelle S. Hirsch, M.D., Ph.D.

Session 2

Patterns of Esophagitis

Rhonda K. Yantiss, M.D.

All You Ever Wanted to Know About UIP

Sanjay Mukhopadhyay, M.D.

Session 3

Practical Approach to the Endometrial Biopsy I: Endometrial Hyperplasia and Metaplasia

Marisa Rose Nucci, M.D.

Hepatocellular Mass Lesions - New Aspects of Old Problems

John Hart, M.D.

Session 4

Urothelial Carcinoma, Conventional Versus Variant Morphology

Michelle S. Hirsch, M.D., Ph.D.

IBD and its Mimics

Rhonda K. Yantiss, M.D.

Session 5

Not Your Grandpa's Thoracic Pathology: Changes in Concepts, Diagnoses, Terminology, and Therapy in the last 10 years

Sanjay Mukhopadhyay, M.D.

Practical Approach to the Endometrial Biopsy II: Endometrial Carcinoma

Marisa Rose Nucci, M.D.

Controversies in Lung Pathology

Sanjay Mukhopadhyay, M.D.

Session 6

Acute and Chronic Hepatitis

John Hart, M.D.

A Contemporary Approach to Prostate Adenocarcinoma, Including Poor Prognostic Factors

Michelle S. Hirsch, M.D., Ph.D.

Session 7

Common Morphologic Patterns of Soft Tissue Tumors

John R. Goldblum, M.D.

Session 8

NASH and the Differential Diagnosis of Steatohepatitis

John Hart, M.D.

The Differential Diagnosis of Celiac Disease

Rhonda K. Yantiss, M.D.

Update on Endocervical Glandular Neoplasia

Marisa Rose Nucci, M.D.
